

DISASTER PREVENTION MANUAL (FOR STUDENT)

Be sure to read the manual and keep with you at all times

Daily Preparation

- Check the location of an evacuation shelter
 - Landslide : _____
 - Flood : _____
 - Earthquake : _____
- Sign up disaster information service of local government
- Check with your family on how to contact each other and meeting spot
- Check on how to contact PUH staff and friends
- Prevent furniture from falling
- Do not place any objects in the hallway through outside
- Prepare emergency supplies
- Check the route on how to go home on foot
- Sign up for Disaster Emergency Message Service

In the event of Earthquake

- Don't panic and secure your safety
- [During an Earthquake]**
- Hide under a desk or place to protect from falling objects, and protect your head with a bag or clothes
 - Keep away from glass and/ windows that may break
 - Extinguish any fire source (If possible)
 - Secure an exit such as door or window to evacuate
 - Press buttons of all floors if you are in an elevator
- [After an Earthquake]**
(In case you are in school)
- Stay in a classroom in a safe position until instructed otherwise

- Follow instructions and move to an evacuation shelter
- Go down stairs very carefully (Never use an elevator)
- Await further instructions from Disaster Management Team after evacuation

- (In case you are outside)
- Protect your head with an object such as bag and keep away from buildings
 - Protect yourself from broken glass
 - Move to an evacuation shelter after an earthquake

[After a Disaster]

- Do not move unless necessary—
- Check availability of public transportation, happening of black out or not, and disaster information around your area.
 - Don't be misled by wrong information or lies, and check for correct information from the local authority
- [Returning home]**
- Walk on wide roads to go home—
Keep the following in mind when returning home
 - You are allowed to return home if it is possible to return during day time.

- Return home in a group when possible.
→ Help each other
 - Return home by walking along the side of the highway.
→ Highway is wider and safe when allowed to walk
 - Use home-return support service at convenience stores or gas stations
- ※If you can't return home during daytime, stay at the school.

Torrential Rain·Landslide Disaster

- Collect information for safety
- [Prepare for Typhoon]**
- Typhoon is predictable beforehand
 - Check the scale of typhoons and the estimated arrival time
- [Prepare for Torrential Rain]**
- Torrential rain that happens suddenly in a small area is unpredictable.
 - Check environmental conditions in your area
- [Pay attention to Landslide]**
- Evacuate immediately if the height of a slope next to your house is over 4m.

- Sign of Landslide
 - Spring water fountain keeps running after rain
 - Pebbles and soils falls from a mountain slope
 - The color of fountain or river is dull
 - Cracks in ground
 - Ground-Rumbling Sound
 - ※Landslide may happen if you notice a muddy smell.
- [Keep away from dangerous areas]**
- Stay away from the place where a tidal wave, flood, and landslide may happen
 - Contact to your neighbor and evacuate earlier if you feel in danger.
 - Check in advance how to evacuate and the locations of evacuation shelters

[Evacuation Order]

Check up-to-date information through TV, radio, or cellphone
Evacuation order or advisory will be released through local government , media, fire-department or police. Follow their instruction to evacuate

Alert Level3: Risk of disaster, Evacuation of the Elderly,etc.
Note:An Alert Level 3 indicates that everyone living in the evacuating area should prepare to evacuate if the Alert Level is raised.

- People who may have difficulty evacuating quickly or who feel that they are already in danger should proceed to evacuate themselves.
- Alert Level4: High risk of disaster, Evacuation Instruction
- Alert Level5: Disaster occurrence Emergency Safety Measures

In the Event of A Fire

- Pull the alarm first (Fire Alarm)— **[Initial Action]**
- Be sure of your safety and put out the fire with a fire-extinguisher

- If no fire-extinguisher is available, cover the fire with wet towels or clothes to cut off the oxygen source
- [If you fail to extinguish the fire, evacuate immediately]**
- if you fail to extinguish the fire, or the fire reaches up to ceiling, stay calm and evacuate immediately.

[Smoke]

- Cover your mouth with a wet handkerchief or clothes and evacuate with crawling the floor.
- Go down stairs holding the handrail , or putting your hands on a wall that is not hot.
(Never use an elevator)
